DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A"; then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B." The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example,

the totals for grades 1, 2, 3, and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again, totals for grades 5, 6, and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these items under Summaries for Term.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B." The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again, totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these items under Summaries for Term.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B." The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again, totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these items under Summaries for Term.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B"; the number of all the items opposite "Total-A", and the total of all the items under "Total-B"; The total of all the items opposite "Total-A" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these items under Summaries for Term.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B." The total of all the items opposite "Total-A" and the total of all the items under "Total-B," placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.

A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again, totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.

"Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarised should check with the summaries of these items under Summaries for Term.

DIRECTIONS.—After the number of pupils is filled in properly in the first vertical column for the first grade and then for the other grades, the number in each grade is to be totaled as provided opposite "Total-A;" then the number of children under seven years of age for all grades as recorded should appear under "Total-B" in the proper space; in similar manner the number of children of other ages should be totaled in the appropriate spaces under "Total-B." The total of all the items opposite "Total-A" and the total of all the items under "Total-B" placed at the bottom of the column headed "Total-B" should be the same. This is an easy method of checking the data required in the table.
 A further check should be made of the Age-Grade Distribution against the table appearing under Summaries for Term, shown on the opposite side of this sheet; for example, the

totals for grades 1, 2, 3 and 4 in the Age-Grade Distribution should be the same as the total of item 9 in Summaries for Term. Again, totals for grades 5, 6 and 7 in the Age-Grade Distribution should be the same as the total for item 13 under Summaries for Term. Totals for grades 8 and 9 in the Age-Grade Distribution should be the same as item 17 under Summaries for Term and the totals of grades 10 and 11 under Age-Grade Distribution should be the same as item 21 under Summaries for Term.
 "Total-C" above calls for the total number of pupils promoted, failed, and dropped for each grade; these totals when summarized should check with the summaries of these items under Summaries for Term.
