NOTE.—The Superintendent will consult the Standard of Requirements for High Schools very closely and make out this report, which is exceedingly important at this time, with particular care. The reports last year frequently noted as a High School any school in which higher branches were taught. Give number of High Schools, not number of rooms.

EXPLANATIONS—Table No. 10—(a) Found by multiplying average daily attendance by 100 and dividing by average monthly enrollment. (b) Found by dividing the aggregate amount of money paid and to be paid to the teachers of the school for services during the year, by the number of pupils on the roll, and dividing the quotient by the number of months the school was taught.
