I certify that the above Report is Correct,

L. M. Shumate

Superintendent of Schools.

Aug. 31st .... , 1889.

Superintendent of Schools.

EXPLANATIONS.—TABLE No. 1.—[a] In reporting the number of pupils enrolled, the average monthly enrollment, and average daily attendance, the Superintendent must not forget to make allowance for pupils that attended more than one public school during the school year, so that [they may] not be counted twice. [b] Found by multiplying the number of white (or colored) pupils [enrolled] by 100, and dividing the product by the white (or colored) school population. [c] Found by multiplying the average attendance of white (or colored) pupils by 100, and dividing the product by the white (or colored) population. [d] Found by multiplying the average daily attendance of white (or colored) pupils by 100, and dividing the product by the average monthly enrollment of white (or colored) pupils. [e] Found by dividing the total average monthly enrollment by the number of teachers. [f] Found by dividing the sum of the ages of all the pupils by the number of pupils.

TABLE No. 2.—[a] Counting each grade of one teacher in a graded school as one school. [b] Found by dividing the whole number of days during which all the schools continued in session by the whole number of schools. [c] Found by dividing the whole number of months during which all the schools continued in session by the number of schools—here, as before, counting each grade of one teacher in a graded school as one school. [d] All the teachers and assistant teachers should be reported; where one teacher ceases to teach before the expiration of the term and is succeeded by another, report only one teacher; where a female succeeds a male, or vice versa, or a colored teacher succeeds a white, or vice versa, the sex and color of the teacher reported should be those of the teacher longest employed. [e] Do not report white teachers of colored schools under this head. [f] Found by dividing the whole amount paid and to be paid male teachers for services rendered during the year, by the whole number of months taught by male teachers. Find average monthly salary of females in the same manner.
