Willisville, Va.  
Sept 1930

We, the patrons of Willisville feeling and knowing the danger which will befall our children in case a wind storm or some other catastrophe strike the already damaged building, petition the School Board of Loudoun County to give some consideration at once and render aid by looking after the school building and bracing it or take some other preventive measure to correct further damage to the lives of our children.

We do ask an early and favorable reply, please.
